

# About Us

- 1 Veyon is the most widely used OpenSource classroom management software (published under the terms of the [GNU GPL v2](#)) with more than 100,000 downloads per year.
  - 2 We commit ourselves to the idea of free and OpenSource software to support students and educational institutions around the world.
  - 3 Veyon Solutions – based in Chemnitz/Germany – is the company driving forward the development of Veyon and offering additional commercial solutions and services.
  - 4 The community behind Veyon is made up of dozens of volunteers who [contribute their time and skills](#) for the project.
  - 5 Our history started in 2004 with the well-known predecessor software iTALC. Our roadmap for Veyon [is publicly available](#).
